## INTRODUCTION

**Syneos** is a comprehensive, yet easy to use web-based Learning Management System that enables organisations of any size to easily track student learning efforts in real time.

No two organisations are alike and we cater to each organisation's respective needs. **Syneos** will adapt to your needs and specifications.

**Syneos** complies with two industry leading standards: SCORM and AICC.

**Syneos** comes in a variety of languages which can be supplemented. In addition, **Syneos** offers access to different user groups such as administrators, students, trainers and training managers.

## FEATURES

**Syneos contains a unique and down-to-earth feature set:**

### Course Management

Add and schedule courses (Instructor lead training, e-learning and m-learning). Courses can be scheduled for a predetermined time span and for one or more independent user groups.

### User Management

Manage users and their profiles. Users can be categorised in a variety of ways for easy scheduling or reporting.

voornaam	naam	Company	taal	userstatus	Tasks
William	Baert	Verridian plc	en	Active	
Lucy	Fields	Verridian plc	en	Active	
Daisy	Mc Kinsey	Verridian plc	en	Active	
Francis	Romic	Verridian plc	en	Active	
Donald	Wise	Verridian plc	en	Active	
Erlend	Zonis	Verridian plc	en	Active	

### Reporting

The most common reports are already built-in but any combination is possible. Export to MS Excel or PDF format for ease of transfer or review.

Name	Questions	Results	Run	Tasks
Autumn High	Edit	Results	preview   print	
Autumn Low	Edit	Results	preview   print	
Course Evaluation	Edit	Results	preview   print	
Spring High	Edit	Results	preview   print	
Spring Low	Edit	Results	preview   print	
Summer Hight	Edit	Results	preview   print	
Summer Low	Edit	Results	preview   print	
Syneos Quiz High	Edit	Results	preview   print	
Syneos Quiz Low	Edit	Results	preview   print	
Training Syneos	Edit	Results	preview   print	
Winter High	Edit	Results	preview   print	
Winter Low	Edit	Results	preview   print	

### Scheduling

Graphical presentation of all courses in a convenient calendar layout. Makes planning of your resources simple.

### Test and Evaluations

Users can take tests or polls. Quiz question types go far beyond the traditional multiple-choice. Answers can also be linked to a weighting scale.

Different evaluation cards can be set-up and linked to a certain training event or user pool.

### Loyalty Programme

Our optional rewards programme is designed to motivate further growth through reward and recognition. It is based on credits that are gained when students complete courses, course parts, tests or attend events. Your administrators determine what action triggers what response. The system automatically keeps track of the credit reward points which can be spent, for instance, in an online shop.

### Automated communication

Controlling a vast amount of students, groups and courses requires a well-managed communication system. Syneos automates the communication flow by sending out e-mails and required reminders.

## BENEFITS

### Web-based

No hardware purchase, secure, available 24/7 worldwide

### Cost-efficient

Manage vast student groups with minimal personnel and IT cost

### Time efficient

Reduce time-to-competency and have courses available around the clock

### Updated

Allows you to monitor your training return on investment with ease

### Easy to use

No process engineers required to run it, plain user interface on the student side

### Flexible

Syneos adapts to your situation, not the other way around!

### Motivational

Loyalty programme available for that extra push
